

indico for JACoW

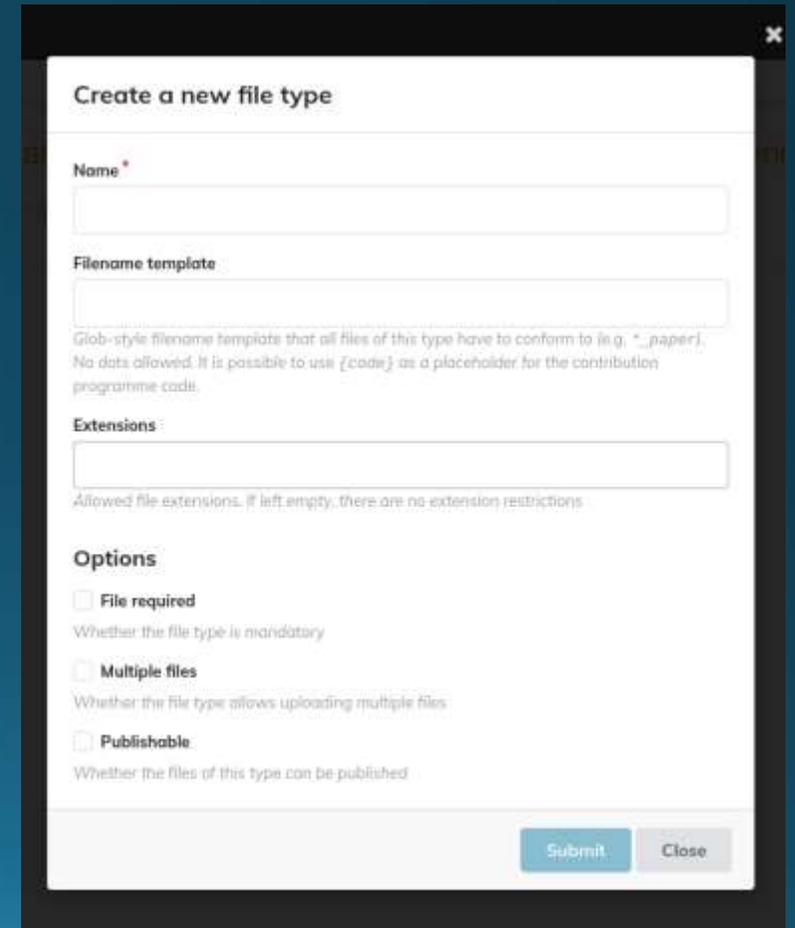

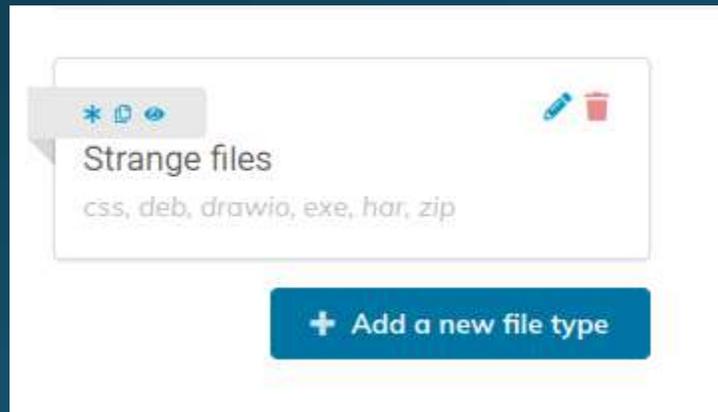

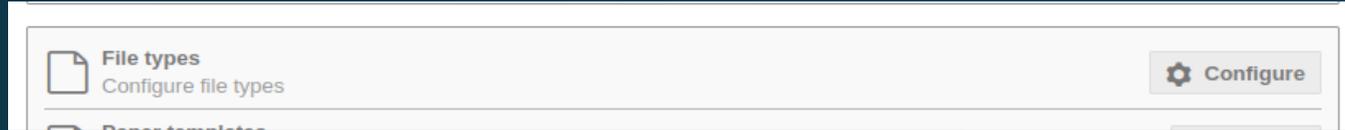

Peer Review Module

JACoW Team Meeting 2025

Michel Succar (CERN)

Status of proposed features

- Implement customizable file type system like the one in the editing module (Under review)

A screenshot of a 'Create a new file type' form. The form is titled 'Create a new file type' and has a close button in the top right corner. It contains several input fields and options:

- Name ***: A text input field.
- Filename template**: A text input field.
- Glob-style filename template that all files of this type have to conform to (e.g. `*_paper`). No data allowed. It is possible to use `{code}` as a placeholder for the contribution programme code.
- Extensions :**: A text input field.
- Allowed file extensions. If left empty, there are no extension restrictions
- Options**: A section with three checkboxes:
 - File required**
Whether the file type is mandatory
 - Multiple files**
Whether the file type allows uploading multiple files
 - Publishable**
Whether the files of this type can be published

At the bottom right of the form, there are two buttons: 'Submit' and 'Close'.

Status of proposed features

- Limit the number of evaluations run that can be done (Approved)
- Disable the comment field or hide comments from authors (Approved)
- Add new role “Observer” (To be discussed)
- Automatic paper submission for editing after LPR acceptance (Approved)
 - Event managers should be careful to set the same file type system configurations for both modules so the submission isn't rejected

Thank you!
