IPAC'23 - 14th International Particle Accelerator Conference

Contribution ID: 955 Contribution code: TUPA109

Type: Poster Presentation

EuPRAXIA doctoral network

Tuesday, 9 May 2023 16:30 (2 hours)

EuPRAXIA is the first European project that develops a dedicated particle accelerator research infrastructure based on novel plasma acceleration concepts and laser technology. It focuses on the development of electron accelerators and underlying technologies, their user communities, and the exploitation of existing accelerator infrastructures in Europe. It was accepted onto the ESFRI roadmap for strategically important research infrastructures in June 2021 as a European priority.

To fully exploit the potential of this breakthrough facility, advances are urgently required in plasma and laser R&D, studies into facility design and optimization, along a coordinated push for novel applications. EuPRAXIA-DN is a new MSCA Doctoral Network for a cohort of 12 Fellows between universities, research centers and industry that will carry out an interdisciplinary and cross-sector plasma accelerator research and training program for this new research infrastructure. This contribution gives an overview of this interdisciplinary network and its research.

Funding Agency

This project has received funding from the European Union's Horizon Europe research and innovation programme under grant agreement no. 101073480 and the UKRI guarantee funds.

Footnotes

I have read and accept the Privacy Policy Statement

Yes

Primary author: Prof. WELSCH, Carsten (The University of Liverpool)

Presenter: Prof. WELSCH, Carsten (The University of Liverpool)

Session Classification: Tuesday Poster Session

Track Classification: MC3: Novel Particle Sources and Acceleration Techniques: MC3.A22: Plasma Wakefield Acceleration
