Overall status of the HL-LHC project

Tuesday, 9 May 2023 11:00 (30 minutes)

The High-Luminosity LHC project aims at increasing the LHC luminosity by an order of magnitude, and support LHC operation till the early 2040s. This presentation will review the overall HL-LHC project status. Many HL-LHC achievements will be available for reporting by mid 2023, starting with the finalisation of the Civil Engineering and extending up to the triplet magnet prototype demonstration.
