Type: **Invited Oral Presentation**

## **Accelerators for particle physics**

*Friday, 12 May 2023 12:00 (30 minutes)*

Particle physics has been a major innovation driver and user of accelerators over the last century. Some past highlights are quickly presented and the future directions in particle physics are discussed. Future options for accelerators are reviewed, also discussing major constraints in beam energy, luminosity and practical details, like power consumption.
