Accelerator researchers who have helped me

Thursday, 11 May 2023 15:35 (15 minutes)

In 1981 when I entered KEK, I did not know anything about accelerators and beam dynamics at all. Since then I have been helped by so many accelerator researchers in Japan and many countries. Here let me pick up a number of such people who could help me though my accelerator research. This prize is only made possible by those people.
