Referencing & Citations, Rules & Styles

Wednesday, 9 November 2022 09:50 (20 minutes)

Good citations and references are essential to ensure that the work of others is correctly acknowledged and valued, and the quality of references within JACoW proceedings is important because it enables the proceedings to become indexed within various providers such as Thomson Reuters Web of Science. This talk will explain and demonstrate the conventions and standards which JACoW requires for citations within the papers it publishes. Additionally, this presentation will look at some of the common citation formats that you would likely encounter, and how to translate them into the JACoW preferred form.
