

# Development for beam injector using laser-driven ion acceleration

*Thursday 29 August 2024 16:00 (2 hours)*

The development of a few MeV/n carbon ion injector using laser-driven ion acceleration by Target-Normal Sheath Acceleration (TNSA) is carrying out. And the prototype injector has been completed at QST-Kansai in Japan. The beam commissioning is underway and first data on beam characteristics obtained from them will be presented.

## Footnotes

## Funding Agency

**Authors:** OKANO, Akari (Nara Women's-Univ.); MATSUMOTO, Haruya (Kyushu University); SAKAKI, Hironao (National Institutes for Quantum Science and Technology); Dr TSUTSUI, Hiroshi (Sumitomo Heavy Industries, Ltd.); KUROKI, Hiroyoshi (Hitachi Zosen); KONDO, Kiminori (National Institutes for Quantum Science and Technology); OHTOMO, Kiyotaka (The Institute of Physical and Chemical Research); ISHII, Kunikazu (Nara Women's-Univ.); NISHIKINO, Masaharu (National Institutes for Quantum Science and Technology); INOUE, Norihiro (Hitachi Zosen); KOJIMA, Sadaoki (National Institutes for Quantum Science and Technology); OISHI, Sayaka (Nara Women's-Univ.); MIYATAKE, Tatsuhiko (Kyushu University); DINH, Thanh-Hung (National Institutes for Quantum Science and Technology); SHIRAI, Toshiyuki (National Institutes for Quantum Science and Technology, Accelerator and Medical Physics); HATA, masayasu (National Institutes for Quantum Science and Technology)

**Presenter:** SAKAKI, Hironao (National Institutes for Quantum Science and Technology)

**Session Classification:** Thursday Poster Session

**Track Classification:** MC3: Proton and Ion Accelerators and Applications: MC3.2 Ion linac projects
