## Status of the Shanghai Soft X-ray Free-Electron Laser facility

*Monday 19 August 2024 10:30 (10 minutes)*

The Shanghai Soft X-ray Free-Electron Laser (SXFEL) facility is the first X-ray FEL facility in China, completed in 2022 and officially opened for operation in 2023. It is based on a 1.5 GeV normal conducting high gradient C-band linac and currently contains two FEL beamlines and five experimental stations. The SXFEL can cover the whole water window range with the shortest wavelength of 2 nm. This report will give a brief introduction of the basic information of the SXFEL facility, its current operation status, the advanced FEL experiments that have been conducted and planned for the future.

### Footnotes

### Funding Agency

**Primary author:** FENG, Chao (Shanghai Advanced Research Institute)

**Presenter:** FENG, Chao (Shanghai Advanced Research Institute)

**Session Classification:** First Lasing, New FEL projects and Facility Reports

**Track Classification:** New FEL projects and Facility Reports
