

eeFACT 2025 - 70th ICFA Advanced Beam Dynamics Workshop on High Luminosity Circular e⁺e⁻ Colliders

Contribution ID: 239 Contribution code: FRA08

Type: not specified

Simulations on SBL

Friday 7 March 2025 15:20 (20 minutes)

Beam-dust interaction is discussed. Heating, ionization, melting, fusion and evaporation processes are simulated in interaction with beam. It is shown that beam is aborted by interaction with the charged cloud of dust and evaporated ions.
