## **Network system upgrade and information security management system implementation at NSRRC**

*Thursday 5 June 2025 15:30 (2 hours)*

With the advancement of science and technology, people are more dependent on the Internet and digital technology. We continue to improve our network system to increase speed and security of information transmission at NSRRC. We had established various levels of Information Security System (ISMS) documents and conducted many tasks and obtained the certification of ISO-27001.
